

# Hi-Tech's colour palette

Compliment or Contrast.

From the fiery tones of Australia's outback to the greens and greys of bush and rock,

Hi-Tech's colour palette lets you stretch your imagination and complement or contrast with your existing colour scheme and garden.

Sandstone	Autumn Tan	Flesh
Shale Grey	Storm Grey	Burgundy
Slate Green	Clay	Straw
Terracotta	Coffee Brown	Harvest Gold
Black	Coral	Federation Green
Light Stone	Fawn	Leather
Brick Red	Burnt Orange	Western Sand
Sandy Beige	Off White	Sky Blue

Hi-Tech's colours are formulated to stay looking beautiful year after year. Our colour hardeners are of the highest quality, complying with strict Australian standards. Only UV resistant pigments complying with World Standards (see technical information) are used to ensure vibrant and long-lasting concrete surface colours. A blend of different dried silica sand sizes are used in correct proportions to create a dense and hard-wearing surface finish.

#### COLOUR DISCLAIMER

All colours are suitable for stencil, spray-on and stamped Concrete methods. Spray-on colours may appear slightly darker. Please note, colours in this brochure are reproduced as accurately as modern printing processes will allow. Variations in colour may occur depending on the job conditions and process used by your contractor. Hi-Tech StencilCrete regrets it cannot be responsible for any variations in colour.
